

COUNTRYSIDE BROADBAND LIMITED

Our standard service provides maximum speeds of 25 Mbit/s down and 5 Mbit/s up. This is charged at a monthly rate of £36 (including VAT).

There are no usage limits and you get a static, public, IPv4 address.

We also have a lower-priced service which may appeal to those whose needs are small. The speeds are 12 Mbit/s down and 2 Mbit/s up. This is charged at a monthly rate of £33 (including VAT). The usage is capped at 15 GB per month.

Our services are provided for a minimum period of one year. After the first year the service may be cancelled by giving one month's notice.

There is a service activation fee, which will be between £54 and £200 (including VAT), depending on the complexity of the installation work. The amount of the service activation fee will be advised after the survey and before any work is started. A suitable router is necessary; we can supply one for £25 (including VAT). Some customers may already have a router which can do the job, in which case we are happy to configure it to suit our network requirements..
